

YOUTH CAREER NAVIGATION

2016-2017 STATISTICS SUMMARY (As of July 18, 2017)

1. 17 - Different Schools / Groups / Organizations with which AmeriCorps engaged

2. 191 - Presentations / Workshops within those schools & organizations

3. 1,557 - Unduplicated Students Reached

NOTE: AmeriCorps asked that we reach 600 unduplicated students. Last year the previous Youth Career Navigators reached 1, 485... so we surpassed their outreach, and hope to reach our personal goal of 1600 before the end of the summer.

4. Approximately 644 at-risk students reached - just above 40% of the total

NOTE: AmeriCorps also asked that we target and reach 400 students or more who were deemed higher risk... which was determined by the percentage of kids at each school on the free lunch program. We significantly passed that goal.

5. 60% (approximate) overall rate of improved knowledge between the pre- and post- assessments

NOTE: 60% was the goal set by AmeriCorps. Improvement rate for 2nd quarter was 52%, for the 3rd quarter was 61%, for the 4th quarter is 67% thus far.

6. 3,735 – Duplicated Students Reached

7. 18 Volunteers Assisting w/Mock Interviews

NOTE: Half of our volunteers were community members who had an interest in helping with a worthy cause, and half were Workforce / Worksource employees taking time out of their day to be part of something wonderful. All of them came away energized and excited by how much FUN they had, and by how impressed they were with the students.
